Due:        before 6th of Nov (ie latest Nov 5th, 23:59)

Turn in:     Upload your assignment to
https://drive.google.com/drive/folders/1KjDbU9ljx9ShvvHOfFI9h-_UY-uTVsXS?usp=sharing

Name your file: **LASTNAME_Firstname-A5-AbstractCitation.pdf**

Body:       THEIR abstract:          copy-paste, with bibilographic reference
               Your abstract:           4-6 sentences (~150 words)
               Your citation:            1 sentence, with paper reference

Part I: Abstract
1. Pick a new *research* article (eg., from the CHI, VLDB, NeurIPS proceedings)
2. Read the paper
   - Skim it first
   - Re-read it carefully
3. Answer the following questions:
   - What is the specific problem does the paper address?
   - What research methods did they use?
       (interviews? observation? field study? experiment? design a system? benchmark? theorem proof?)
   - What were their results from each method?
4. Write your own 4-6 sentence (~150 words) abstract, based on your answers
   DO NOT just copy their abstract structure/wording

II: Citation
In one sentence, cite the paper the way you would if you were writing a paper:
   Examples:

   *The XYZ technique (Smith & Jones, 2012) allows users to ...*
   or
   *Dubois (2014) demonstrated that users require xxx to ...*

Anastasia Bezerianos & Wendy E. Mackay
