1. Make groups of 2. Collaborate on creating the slides.
2. Read a new research article (a relative recent one that no one in the team has read before).
3. Create a presentation based on the research article you both read. Your job is to convey the key contributions of the work in *(about 8-10 slides is what you should be aiming for)*.

Slide 1: Full paper title + your names + one-sentence contribution summary

Slide 2: Introduce and justify the problem

Slide 3: Explain most relevant related work

Slides 4-8: Describe/illustrate what the authors did (including results)

Slide 9: One-sentence summary

Present a brief critique

Slide 10: Conclude with directions for future research

4. Give a **15-minute** presentation of the paper. Each person should present part of the talk. We will ask questions after each presentation.
