Goals for today

1. Create rough groups

2. Start brainstorming ideas about
   how to empathize with users

Empathize with your user.
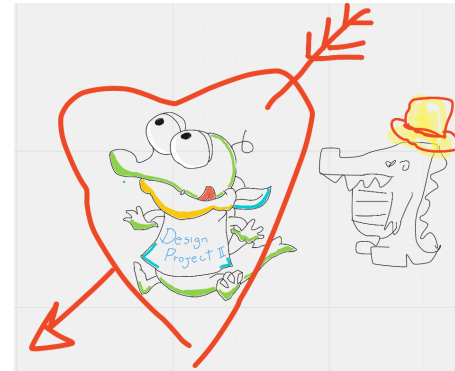

Define needs and insights.

Ideate: Generate radical design alternatives.

Prototype: Get ideas and explorations out of your head and into the physical world.

Test: It is the chance to get feedback on your solutions

Iterate…

Goal for today

For the groups that have 3-4 students you
    can start chatting about how to approach users

For the rest, let's look at the Miro board
